Island Adventure

Max was staying with his cousin Jeff by the sea. Every day, the boys went to the beach and played football or went fishing. But one day, they stood on the sand and stared across the sea at a small island in the distance. No one

lived on the island and the boys had never been there.

"I'd like to explore that island," said Max. "Let's borrow my brother's boat and go there," said Jeff.

"We'll be back before he finds out!"

The boys rowed to the island and left the boat on the sand. They climbed trees, swam in the river and found some caves. At last, they decided to go home, but when they went back to the boat, it wasn't there! The boys were frightened.

"What are we going to do?" asked Max. "Nobody knows we're here!"

"Let's make a fire," said Jeff. "Someone will see the smoke."

"But we haven't got any matches," said Max.

"We can hit two rocks together to make a fire. Come on! It's easy."

But it was dark before the boys had a fire.

Suddenly, there was a splash of water.

The boys stared across the sea. A dark shape was coming towards them.

"Run!" shouted Max.

"Hey!" said a voice. "Don't you want to go home?" Jeff's brother was standing on the beach next to the missing boat.

"How did you find us?" asked Jeff in amazement.

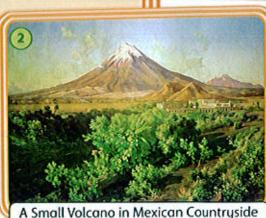

"I saw the boat <u>floating</u> near the shore, so I swam out to get it.

Then I saw your smoke and I realized what happened."

"That was lucky," said Jeff.

"Yes, but next time," said Jeff's brother, as they rowed back, "tell me before you take my boat out and always tie it to a tree!"

Writing

- 1 Look at the story. What is it about?
- 2 Read.

A story

There are lots of things to remember when we write a story.

We can start a new line when someone new speaks.

We use adverbs to describe how people say things and how people feel.

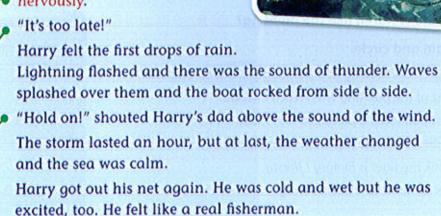

When we know who's speaking, we don't have to put their name.

We put the speech and the punctuation inside the speech marks.

A Stormy Day at Sea

Harry was on a boat trip with his dad. It was cloudy, but it wasn't raining, so they sailed for out from the shore. When they stopped and took out their fishing nets, the sky suddenly went dark.

- "I think there's going to be a storm," said Harry's dad. "Shall we go back?" said Harry
- nervously.

- 3 Read again and answer the questions.
 - 1 How long does the storm last?

2 How does Harry feel after the storm has finished?

4 Write this dialogue correctly.

It's a lovely day! said Mandy. Do you want to go to the park? asked Olivia. I can't! said Mandy Why not? asked Olivia. I have to tidy my room, said Mandy sadly. I'll help you! said Olivia. Oh thank you! said Mandy happily.

Tanya Streeter

Tanya Streeter grew up on Grand Cayman Island in the middle of the Caribbean Sea. When she was a child, she loved being in the sea and she spent as much time as possible in the water, snorkelling and studying fish and other sea life. She also liked diving deep down into the ocean to look for rocks and shells. Tanya had a natural love of diving and, one day, she discovered a sport she could do.

The sport was called free-diving. Thousands of years ago, people dived deep into the oceans to catch fish and to look for pearls. But they didn't have any diving equipment to help them breathe in those days. Today, this kind of diving has become a popular sport. People dive as deep as possible with no breathing equipment. They stay under the water for as long as they can and try to break world records.

Tanya had one lesson in free-diving and found out that she was very talented. She had more lessons and then started to enter competitions and compete against people from all over the world. At 25, she broke her first world record when she dived 113 metres down into the ocean. She broke many more records after that. Tanya trains for four or five hours every day in the gym and in the pool. But the freedom she feels when she's free-diving makes it worth all the hard work.

Tanya is also interested in looking after the environment and protecting wildlife. She has worked hard to tell the world about the problems that whales and dolphins have with sea pollution and how dangerous it is for them. She has appeared in videos swimming with whales and has also become a popular TV presenter.

3 Read again and write True or False.

Tanya Streeter lived on an island.

The festival has been on for five days now and there are still thousands of people in the streets of London. I've been here since nine o'clock this morning and it's been great! The procession has already finished. You can probably see the floats in the distance. There are food stalls everywhere and I've just eaten some delicious pancakes with chocolate sauce. I haven't seen any fireworks yet. They're going to be on later tonight.

2 Read and learn.

Present perfect with since and for

Use the present perfect and since to talk about past actions after a certain time or date, e.g. 2 p.m., last Saturday, May.

I've been here since nine o'clock this morning.

Use the present perfect and for to talk about past actions in a period of time, e.g. a week, two hours, a day.

The festival has been on for five days.

Present perfect with already, just, yet and before

We use these time words with the present perfect:

The procession has already finished.

I've just eaten some delicious pancakes.

I haven't seen any fireworks yet.

Have you eaten yet?

I've never eaten anything so delicious before.

Top Ten Food Festivals

Going to festivals is always fun, but going to festivals that have delicious food is even better! Here are some of our favourite food festivals around the world. They celebrate special foods that are made or grown in that part of the country.

- 1 If you like chocolate, you will love Eurochocolate. This festival takes place in October every year, in Perugia in Italy. It <u>lasts</u> for nine days. What does it <u>celebrate</u>? Chocolate, of course! Nearly one million people go to the festival every year. The streets are full of places to buy different kinds of chocolate <u>snacks</u>. You can also see chocolate sculptures. One year, there was a huge igloo made from chocolate <u>bricks</u>! At the end, the sculptures are broken up and given to people at the festival to eat!
- The Gilroy <u>Garlic</u> Festival is one of the largest food festivals in the US. The festival takes place every year in Gilroy, California. It happens on the last weekend in July and it is one of the best garlic festivals in the world! So, what do people do? Well, they eat lots of things made with garlic, including garlic ice cream and garlic chips! There are also garlic cooking <u>demonstration</u>s! If you like garlic, this is a great festival to go to!
- If you go to India in July, you should go to the Mango Festival! In India, mangoes are called 'the king of fruits'. Mangoes are grown in India and they are very popular! The mango festival is in Delhi and goes on for two days. There are more than 500 types of mango! You can taste different mango dishes, mango jams, mango juices, mango desserts and anything else with mango in it! There is also a competition with a prize for the biggest mango!

- Dear Cousin Tim,
- Thank you so much for inviting me to Eurochocolate! It was great! It was so interesting to see how chocolate is made. My favourite part of the festival was the cooking class when we learnt to make chocolate ice cream! I made it for my mum and dad when I came back to Egypt. I also loved the chocolate sculptures on the streets.

It was also nice to stay in Aunt Sally and Uncle Tom's lovely, big, red house in Perugia. I loved the city of Perugia. It is a really interesting, old city. I would love to come back to Italy again and see some more cities there.

I have sent you a picture of us together at the chocolate festival so we always remember it. I hope you like it!

Best wishes, Jay

The Olympic Games

The Early Games

The first Olympic Games were held at a place called Olympia in Greece in 776 BC. At first, there was only one race. It was a 170-metre running race called the 'stade'. In the race, local athletes ran across a piece of ground and the whole event was finished in one morning. However, it was very popular, and athletes spent weeks practising and training for the event. Soon, more races and competitions were introduced, and people began to travel from other countries to take part in them. Then, in AD 393, the new Roman Emperor decided to stop the Games completely. Gradually, earthquakes and floods buried the site of the ancient festival.

The First Modern Games

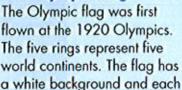

Baron de Coubertin

For hundreds of years, the Games were forgotten. Then, in 1894, a French academic called Baron de Coubertin decided to bring them back. He believed that sport was an important part of peoples' education and that it made them better people. He studied the history of the ancient Games and decided

to organize an international event with many of the traditions from the original Games. In 1896, the first modern Olympic Games took place in Athens and 14 countries took part. Their motto was 'Citius, Altius, Fortius', which is a Latin expression meaning 'Faster, Higher, Stronger.' Baron de Coubertin believed the Games would be a great way to bring people from lots of different countries together to compete against each other and work to be the best sportspeople that they could be.

The Olympic Rings

ring is a different colour: blue, yellow, black, green and red. These colours were chosen because every country had one of these colours in its national flag. It is a symbol of the way that all the countries come together to take part in an international sporting competition.

The Olympic Medals

Olympic medals are designed for each Olympic Games. So, every year, the medals are completely different. There is a medal ceremony after each Olympic event. They raise the flags of each winning athlete's country and play the national anthem of the gold medallist. Then they give the three winning athletes their medals: bronze, silver and gold.

The Paralympic Games

There have been many changes to the Olympic Games over the years. One of the most important is the introduction of the Paralympic Games. In 1948, Sir Ludwig Guttmann organized a sports competition for people with disabilities at a hospital in England. Four years later, competitors from Holland joined them. Then, in 1960, Olympic-style games for athletes with physical and visual disabilities were organized for the first time in Rome. Today, the Paralympic Games are a world-famous sporting event. They take place after the Olympic Games have finished, in the same city.

- 2 Do you like taking part in sporting events? Why (not)?

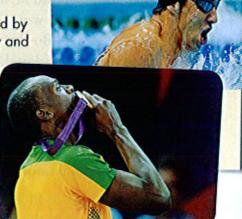

London 2012

In 2012, the Olympic and Paralympic Games took place in London for the third time in history. There are many traditions at the Olympics and one of these is the opening ceremony. There are always fantastic displays of music, singing and fireworks, and people dancing in traditional costumes. There is a procession

of athletes in their teams and the Olympic flag is raised. Finally, the Olympic torch is brought into the stadium and the Olympic flame is lit. Then the

Games can begin.

London's opening ceremony was given the title Isles of Wonder, inspired by Shakespeare's play The Tempest. The show represented Britain's history and culture. It lasted for four hours and was watched around the world by more than 900 million people. There was some great music, including songs by Paul McCartney from the Beatles, Arctic Monkeys and a performance by the London Philharmonic Orchestra. There were some funny moments, too, such as when the Queen appeared with James Bond.

Breaking Records

London 2012 saw some fascinating firsts. Here are some of them:

Usain Bolt: Jamaican sprinter

He made history by being the first to achieve a 'double double' by winning the 100m and 200m titles at two consecutive Olympics. He and his teammates also set the world record for the 4x100m relay.

Michael Phelps: American swimmer

He won four gold and two silver medals, making him the most successful athlete for the third consecutive Olympics. He also became the Olympian with the most gold medals. In total, he has 18 gold, two silver and two bronze medals.

Nicola Adams: British boxer

She became the first female boxer to win an Olympic gold medal.

Sarah Attar: Saudi Arabian runner 🌠

She became the first woman from Saudi Arabia to compete in an Olympic athletics event, when she ran in a heat of the 800m.

Sarah Storey: British cyclist

She broke the record for the women's road race in the Paralympic Games when she finished seven minutes ahead of the silver medallist.

 - 1 Who painted the portrait of Dorian?

Many years ago, there lived a young man called Dorian Gray. He was a handsome and pleasant young man, and he was always very kind to people. Dorian Gray loved art and beautiful things, and he wanted a picture of himself. So, one day, he visited a friend of his, called Basil Hallward. Basil was a talented artist and Dorian asked him to paint his portrait. Basil agreed and, every day, Dorian went to his art studio and sat while Basil painted him.

One day, when Dorian was at the studio, he met one of Basil's friends. The friend's name was Henry Wotton. While Basil painted, Henry talked to Dorian. He told him about beauty and youth. He said that these qualities were the most important things in the world. He said that they were more important than kindness, intelligence, gentleness and patience. Dorian listened very carefully and, soon, he started to believe that this was true.

At last, the portrait was finished. It was a wonderful painting and one of Basil's best works of art. Dorian stared at the picture for a long time. At first, he felt very happy. He saw a handsome young man with a kind and intelligent face. But, after a while, Dorian started to feel sad. He remembered Henry's words and he knew that, one day, he wouldn't be handsome and he wouldn't be young. One day, he would be old and grey.

"I wish," said Dorian suddenly, "I wish that I could always stay young and that the picture would get old."

Henry laughed when he heard this, but Basil was very angry.

"Don't talk like that," said Basil. "That's a terrible thing to say. Many things are more important than youth and beauty."

Dorian didn't believe Basil. He just felt sad because he was going to be old one day.

Dorian took his portrait home, but now his life was different. He didn't see Basil for a long time. He met Henry and his friends instead. They talked and went out to theatres and to

restaurants. Slowly, Dorian started to change. He became hard and cruel. He didn't think about other people's feelings. He only thought about himself.

One day, he looked at his portrait and thought there was something different about it. What was it? He looked more closely. The face had changed. The mouth looked unkind. It was strange. Dorian picked up a mirror and looked at his own face. Then he looked back at the portrait. It was true. The portrait was different.

Suddenly, Dorian remembered that he had wished to stay young while the picture grew old. It seemed impossible, but his wish had come true. Dorian covered the picture. He didn't want to think about this terrible thing.

One day, Basil visited him at home. They talked for a while and then Basil said, "I want to borrow your portrait. I want to put it in an exhibition in an art gallery."

Dorian thought about the painting and how it had changed.

"I'm sorry, Basil," Dorian said quickly and quietly. "But I can't give it to you."

Basil looked at him strangely.

"You've changed, Dorian. You used to be a kind man. Now you are cold and selfish."

When Basil had gone, Dorian took the portrait and put it in a small room. He locked the door and put the key in his pocket.

"No one can ever see this portrait," he said to himself.

And so the years passed, and Dorian still looked young and handsome. He enjoyed his life, but he didn't care about anyone but himself. Behind the locked door of the little room, the picture of Dorian Gray grew older and uglier. The face showed the truth about Dorian's bad life. Sometimes, Dorian went and looked at the picture, and he thought how terrible he had become. He hated the picture and he hated his life.

At last, Dorian decided to be good again. He thought that, if he was good, the picture would change back again. But it was too late for Dorian Gray to change. He died and, when he died, he became old and ugly, and his portrait suddenly changed back to look as handsome and young as it was at the beginning.

Lesson Five

Reading

- 1 Look at the pictures and the text. What are the three types of transport?
- 2 Listen and read. (§) 37

Transport Around the World

The environment is different all around the world. Some people live in places where there is lots of snow, some people live in deserts and some people live near the water. People in all these different places around the world have developed all kinds of transport to help them travel around the environment they live in.

In desert areas, camels have traditionally been used as a form of transport. They are ideal for travelling across the desert because they can survive for a week or more without water. Also, their ears and noses can shut tightly to stop sand going into them, and their feet don't sink into the sand, either. They are known as 'the ship of the desert' because of their ability to carry heavy loads for long distances. There isn't any other animal that could survive so long in the desert, carrying heavy things.

The city of Venice was built on a group of 118 islands. There are 150 canals and about 400 bridges which connect the islands. The only way to get around is on foot or on the water. There are no cars or trucks. The gondola is a traditional Venetian rowing boat and, for centuries, gondolas were the main form of transport. Today, they are still popular with tourists, but most local people travel by motorized waterbuses or private boats. These are faster than gondolas and carry more people.

Large areas in Asia have thick forests that are difficult to explore on foot. For thousands of years, humans have used elephants to help them go into these places for farming and clearing land. Elephants walk on their toes which means they can keep their balance, even on wet mud. They are strong, so they can clear a path through plants and bushes. Today, people still use elephants to transport logs in areas where it's difficult for machines to go.

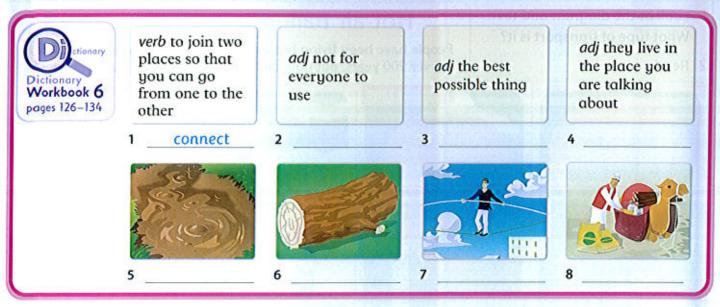

- 3 Read again and correct the words in bold.
 - 1 People used horses to travel across the desert. People used camels to travel across the desert.
 - 2 Camels can survive for a year without water.
 - 3 You can explore Venice by car and on the water.
 - 4 Local people in Venice travel by motorized waterbuses or by private gondolas.
 - 5 Elephants help people in Asia farm and clear land in the mountains.

People have been flying hot-air balloons for over 200 years. But how do they work?

Step 2: To move the balloon down, the pilot pulls the parachute valve rope. It pulls down the parachute valve and hot air goes out of the envelope. When there is less hot air in the envelope, the balloon goes down.

Step 3: A pilot can't steer the balloon. The balloon goes in the same direction as the wind. However, the wind blows in different directions at different heights. So, if the pilot wants to move one way, he can go up or down until he finds a wind blowing in that direction.

Lesson Three Grammar 1

1 Listen and read. Where does chewing gum come from? 🚯 43

In ancient times, people from different cultures chewed gum from trees, but the gum had little flavour. In the 1880s, the Fleer brothers tried to make it taste better. Experiments were done on gum from a tree called the chicle tree. The gum was covered with sugar and named Chiclets. Although the brothers' friends and family liked it, the gum wasn't advertised, so other people didn't know about it.

Chewing gum wasn't sold until the mid-1880s. Factories were opened. Then chewing gum became popular. Today, many kinds of chewing gum flavours are made and chewing gum is bought by people all around the world. However, today, chewing aum isn't always made from trees. Some companies use artificial substances instead.

2 Read and learn.

The passive (present simple and past simple)

Use the passive when you don't know the subject of a sentence (who does an action). Many kinds of chewing gum are made. Or when the object of a sentence is more important than the subject.

Factories were opened by companies.

Negative sentences:

The gum wasn't advertised. Chewing gum isn't made from trees.

Reading

- 1 Look at the text. Find the names of four types of pens.
- 2 Listen and read. 🗞 45

THE HISTORY OF THE PEN

Over 10,000 years ago

People used stones to draw pictures on the walls of caves. They also used sharp objects or bones to make marks on clay.

7,000 years ago

The Egyptians invented paper and also pens to write on it. Pens were made from reeds. Reeds are hollow plants. One end of the reed was cut into a point, or a nib. Then the pen was filled with ink by dipping it into an ink pot to fill up the inside. People squeezed the pen when they wanted the ink to come out.

In the 7th century

People started using quill pens. Quill pens were made from the feathers of birds. The part which the feathers are attached to is hollow. They worked better than reed pens because they were softer and you could squeeze them more easily to make the ink come out. They could also be washed and dried and used lots of times.

In the 10th century

The first fountain pen was made in Egypt. The pen held ink in a reservoir inside the pen and the ink travelled down to the nib. It wasn't necessary to dip the nib into an ink pot, so they were cleaner to use. However, sometimes big drops of ink came out of the pen and ruined the paper.

1938

László Biró invented the ballpoint pen. It had a tiny ball in its tip which rotated as it moved along the paper and picked up ink from a cartridge inside. It worked well because big drops of ink couldn't come out, so it was better because the paper could not be ruined.

1965

The Space Pen was invented. The Space Pen can write underwater, upside down, in extreme temperatures and at zero gravity! For this reason, astronauts use them in space. This pen can do everything! But who knows what pens will be invented in the future!

3 Read again and write True or False.

Louis Braille was born in France in 1809. In 1812, he had an accident and went blind. When he was ten, he went to a school for blind children.

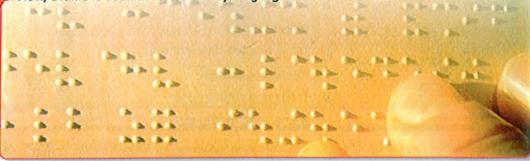

Louis Braille (1809-1852)

To begin with, Louis was very unhappy. The school had books with raised letters made with metal, which blind people could feel with their fingers. But it was very difficult to read and there were only 14 books in the school.

Soon after, a man called Charles Barbier visited the school. He showed the boys his invention, called 'night writing'. It was a code of 12 raised dots. It was also very difficult to read, but it gave Louis an ideal

During the next three years, Louis invented a new code, which only used six raised dots. Today we call it 'Braille'. It was very simple and easy to use. Later, Louis became a teacher for blind people. He also translated many books into Braille.

Now, Braille is used in almost every language all over the world!

Computers - Fun Facts

Who invented the computer?

In 1833, a British inventor, Charles Babbage, made plans for a mathematical machine. It was the beginning of the first computer. Babbage spent 37 years trying to build his machine, but there were many complications and he died before he finished it. The first computer was finally created in 1946. It was called the Small-Scale Experimental Machine.

How big was the first computer?

The first computer was huge. It filled a large room and weighed over 30,000 kilos. That's the same as six adult male elephants! Luckily, as technology has grown, computers have got smaller. Today, you can even buy a computer that's the size of a small mobile phone.

Why is a mouse called a mouse?

The first computer mouse was invented by Douglas Engelbart in around 1964. It was a little wooden box on wheels that could move an on-screen cursor. It was

called a mouse because the wire that connected it to the computer looked like a tail. Luckily, a computer mouse is much smaller now and is usually made of plastic. However, it still looks like the first mouse that was made.

When did the World Wide Web begin?

The World Wide Web was invented by Tim Berners-Lee and Robert Cailliau in 1990. It was immediately successful and, in four years, 50 million people were using it! Today, billions of email messages are sent across the world every day. It is difficult to imagine life without it, as the World Wide Web has changed the world!

In the early 1940s, the president of the computer company IBM said, "I think there is a world market for about five computers." However, today, there are more than a billion computers in the world! Computers become much more important in the world than anyone ever expected!

A research report

We write research reports to show what we have discovered through research.

First, we write an introduction explaining what the research report is about.

We can write headings for each section of the report.

We can use questions as headings when we want to give the answers in a section of the report.

We can give quotes from people who know a lot about the topic.

We can put facts or figures in the report, but we must check that they are true!

My Research Project by Jen Thomas

For my research project, I wanted to find out how the Internet works. Everyone around the world can access the World Wide Web. But how is this possible?

Internet cables

Computers around the world are connected to the World Wide Web by cables that go to every country and bring them the Internet.

Where are the cables?

The cables need to reach all the countries, but there are huge oceans in-between the countries. So the cables lie on the bottom of the sea!

Do the cables ever break?

Yes, the cables break quite often, but the Internet doesn't stop working. The scientist Brad Jennings explains why: "There are lots of cables, so when one cable breaks, it isn't a problem. It's only when they all break at the same time that the Internet stops working."

Why do the cables break?

They can break because of earthquakes, fishing nets or even shark bites! Normally, a cable breaks every year at some point and needs to be repaired.

Digries from Delhi

My name's Suzie. I'm eighteen years old and I'm a student from London. Three weeks ago, I was teaching English in a language school in Tokyo. The job ended, and I decided to take a holiday! I wanted to travel around the world. I put some clothes in a backpack, found my passport, bought a new pair of trainers and said goodbye to my friends. I was sad to go, but I was looking forward to my new adventure.

I've always wanted to go to India, so I bought a ticket to Delhi. I caught a taxi to the airport. I remember feeling really nervous. Was I doing the right thing? Should I stay in Tokyo? Or maybe I should go back home to London? I phoned my mum from the airport and she told me not to worry. If I wasn't happy, she said, I could give it up and come home. I sat on the aeroplane feeling a bit happier. I watched a few films and the time passed quickly. I chatted to the people around me and, by the time we arrived, I'd made some new friends. One of them was from Delhi. She gave me the address of a hotel and that's where I spent my first night.

The next day, I explored Old Delhi, which is the traditional part of the city. Chandni Chowk is the main street. It's very busy, full of cars, cycle rickshaws, hand-pulled carts, people and animals. You can find the oldest and busiest markets in India here, selling all kinds of things, including jewellery, material, perfume and, of course, street food. I love *golgappa* which is a kind of bread filled with chickpeas and spicy potatoes. Indian sweets are delicious, too.

One of the most interesting places I've visited in Delhi is Humayun's Tomb. This monument looks a bit like the famous Taj Mahal in Agra, but it's older. The tomb was built in 1570. It's a very beautiful building and is surrounded by beautiful gardens. Another great place to go is the Red Fort, which was built in 1638. You can see a sound and light show in the evening, which is really amazing.

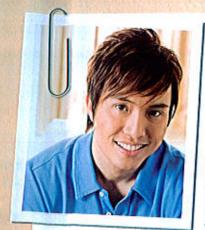

I'm going to spend a few more days in Delhi because I love it so much. Tomorrow, I'm planning to visit the National Museum because I've heard that the art is fantastic. After that, I'll be back on the road! I'll let you know where I decide to go.

Bye for now!

Suzie

I'm Joe and I'm nineteen. I'm from New York, but I've been living in Australia. Two days ago, I was working as a waiter in a restaurant in Sydney. I was having a great time, the weather was amazing and the people were really friendly. It was more like a vacation than a job! Then I decided to give it all up and leave! Why? Because I wanted to see the world!

I bought a new backpack, some jeans, T-shirts and a pair of sneakers. I bought a ticket to Delhi, took some money out the bank and said goodbye to my friends. And then I was ready to go. I caught a cab to the airport. I was really excited, but I was nervous, too. I phoned my mom back home in New York and told her my plans. She said I was doing the right thing and I felt better! I fell asleep on the airplane, so I didn't talk to anyone. I didn't even see any of the movies. When I arrived in Delhi, I found a place to stay and

then I slept again. I was very tired!

At last, I was ready to see the city. Wow! Delhi is amazing! It's crowded and noisy, but there's so much to see and do. They've got some great stores. I spent hours shopping around. The food is great, too! I bought some papdi chaat in one of the street bazaars. It's a kind of bread with potatoes, chickpeas, yogurt and chilli. Delicious! I found some amazing Indian candy, too. It's so sweet!

I've already been to some of the temples, the tombs, the gardens and the mosques. Jama Masjid is the largest mosque in India. It's really amazing! It took 13 years to build, and was completed in 1656. It's

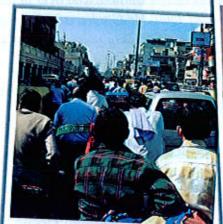

opposite Chandni Chowk in Old Delhi. If you climb to the top of the southern tower, you'll get an amazing view of the city.

They have all kinds of festivals here in Delhi and, next week, it's the start of Holi. This is a Hindu festival, but lots of people celebrate. For two days, people light bonfires and throw colorful paint at each other. I don't want to miss that!

Next week, I'll probably leave Delhi. Where will I go? I don't know yet. I think I'll stay in India for a couple of months, though. I'm loving it here!

Bye!

- 2 What is his life like in his new home?
- 4 What does Mr Gordon say about animals?

Black Beauty is a beautiful horse. He has a fine black coat, one white foot and a white star on his forehead. He is also hardworking and clever. He is patient and easy to train. For the first four years of his life, he lives with his mother on a farm. His master is good and kind but, at last, it is time for him to be sold. He is bought by Mr Gordon, who lives in a place called Birtwick Park. He is looked after there by a groom called John. Mr Gordon and John are both kind men. Black Beauty has a good life and is treated well. Black Beauty pulls Mr Gordon's carriage and gives children rides on his back. Everyone loves Black Beauty, and then he shows how clever he really is ...

One day, in the autumn, Mr Gordon had to go to a distant town on business. John harnessed Black Beauty to the carriage and the three of them went off. There had been a lot of rain, and the wind was very strong. When they came to the river, the water was so high it nearly reached the wooden bridge, and many of the fields were under water. In one low part of the road, the water was half way up to Black Beauty's knees.

They got to the town, and the master's business took a long time. It was late in the afternoon when they started back for home. The wind was much stronger and, as they drove through a wood, Mr Gordon said, "I've never been out in a storm as bad as this, John. I wish we were out of this wood."

"Yes, sir," agreed John. "We don't want one of those branches coming down on top of us."

But just as he finished speaking, there was a great noise of wood breaking, and a big tree came crashing down through the other smaller trees and fell across the road right in front of them! Black Beauty was frightened and stopped immediately, but he didn't turn round or try to run away. John jumped out and quickly ran to his side.

"What can we do now, John?" said Mr Gordon.

"We can't drive over the tree or get round it, sir," said John. "We'll have to go back to the crossroads and take the longer road round to the wooden bridge. It will make us late, but the horse isn't tired."

4 Discuss.

- 1 Did you enjoy the story? Why (not)?
- 2 Do you think Black Beauty has a happy life? Why (not)?
- 3 Do you think Black Beauty is a clever animal? Why (not)?

It was nearly dark when they got to the wooden bridge. They could see water over the middle of it, but this often happened when the river was high. But the moment Black Beauty's feet touched the first part of the bridge, he stopped suddenly.

"Go on, Beauty," said Mr Gordon, but Black Beauty didn't move.

"There's something wrong," said John, and he jumped from the carriage and began to look round. He tried to lead the horse forward. "Come on, Beauty, what's the matter?" Of course, the horse couldn't tell him.

Just then, a man ran out of the house on the other side of the bridge. "Stop! Stop!" he cried.

"What's the matter?" shouted Mr Gordon.

"The bridge is broken in the middle," said the man. "And part of it was carried away. If you come across, you'll fall in the river!"

The two men couldn't believe it. "Thank you, Beauty!" said John. He turned the horse gently round and they took the other way.

It got darker and the wind got quieter as Black Beauty trotted towards home by

another, much longer road. The men were quiet for some time, but then Mr Gordon spoke. "We were very close to drowning in that river, John," he said. "Men may be clever enough to think of things for themselves, but animals know things without thinking. Black Beauty saved our lives tonight. People don't realize how wonderful their animals are."

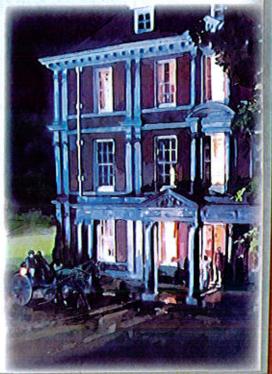

John agreed and the drove on in silence.

When they arrived back at Birtwick Park, Mr Gordon's son ran out to meet them. "We've been so worried," he said.

"Are you all right? Did you have an accident?"

"We nearly did," said Mr Gordon. "But Black Beauty was cleverer than we were, and saved us all from drowning!"

Lesson Five

Reading

1 Look at the pictures. When do you think each ship sailed?

2 Listen and read. N 65

Famous Shipwrecks

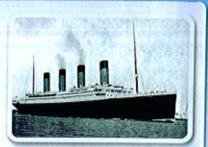

Sailing can be dangerous. Many ships and boats have sunk, and there are many ships lying at the bottom of the sea in oceans all over the world. Studying shipwrecks is important to historians because shipwrecks contain clues about what life was like at the time that they sank.

The Atocha was a Spanish ship that sank in a terrible hurricane in 1622. It was carrying gold, silver and jewels. People were sent

to get the treasure because it was very valuable. However, the ship was lying more than 16 metres under the sea. At the time, it was very difficult to dive down so far. Then, in the same year, there was another hurricane and the shipwreck was destroyed and the treasure was lost. The treasure lay lost beneath the sea for over 360 years. In 1969, a man called Mel Fisher started to search for the treasure. This time, divers had proper equipment. After 16 years, he found the parts of the wreck and most of the treasure. He put the treasure in a museum in Florida, where you can see it now.

The Titanic was a passenger ship built in 1911. It was called the 'unsinkable ship' because of its amazina desian. No one believed

it could sink. On 10th April 1912, the Titanic left England for New York City on its first voyage. Four days later, the ship hit an icebera in the Atlantic Ocean. The ship sank and over a thousand people drowned. For a long time, underwater explorers searched for the missing wreck. In 1985, they discovered it four kilometres beneath the surface The ship was broken and it was impossible to move, but they were able to examine the ship and bring back thousands of items, such as clothes and letters and other personal things. These things have helped historians understand more about the people who sailed on the Titanic.

A personalized text

We can use our imagination to write about something we'd like to do in the future.

We can use lots of different adjectives to make our descriptions more interesting.

Use such as, for example, like and for instance to give examples.

When we are imagining what a situation might be like, we use would. For facts or things we know are true, we use the present simple.

We finish by giving a final reason for our choice.

Being an Explorer

I'd love to be an underwater explorer because I love seeing new places and being in the sea. I love seeing amazing things such as colourful fish. I think it

would be fantastic to look at the bottom of the ocean.

Underwater explorers do different things. Some explorers are scientists. They do scientific research, for example, looking at underwater volcanoes. They also make maps of different areas. Other underwater explorers are historians. They examine shipwrecks and objects inside them like treasure and ancient possessions. They learn lots of things about the past, for instance, how people used to live. Some underwater explorers

are environmentalists. They look at the environment. They study how animals live beneath the ocean and check for pollution.

 I think all of these things would be really interesting to do. That's why I'd love to be an underwater explorer!

Reading

- 1 Look at the interview. When were the Nazca lines discovered?
- 2 Listen and read. 🗞 73

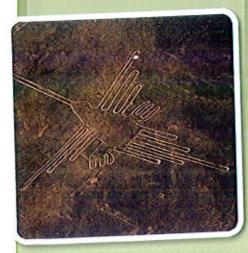

The Nazaa Umes

In this interview, historian Michael Jones talks about the mystery of the Nazca Lines. Michael Jones has studied the Nazca lines for many years.

The Nazca were an ancient people that lived in Peru, in South America, about 2,000 years ago. The people are wellknown for creating the Nazca lines. The Nazca lines are famous all over the world, and they can still be seen clearly and easily today.

They are giant sketches which the Nazca people drew in the desert in the Nazca Valley. Some of the drawings are just long, straight lines, but there were other drawings, too.

3

No, they also drew birds, animals and figures. For example, there's a monkey, a giant condor, which is a type of bird, and a huge spider. There's also a human which has a big, round head and is known as 'the astronaut'. We don't know why they drew these objects.

The desert in the Nazca Valley is made of dark red stones and soil. Underneath there is a lighter, yellow soil. The Nazca cleared away the top to show the lighter colour. The area has a very dry climate and there is little wind. Archaeologists say this is why the drawings were able to survive.

We can't be sure, but it probably took hundreds of years to make so many drawings and probably hundreds or even thousands of people made them. We don't know exactly why the Nazca people made them, although they were obviously very important because they spent so long making them.

The drawings were first discovered in 1927, when a plane was flying across this part of the desert. What is incredible is that because they are so huge, you can only really see them from the air. Today, people travel in small planes and look down on them, but in those days, how did they see them? It's a mystery!

Salisbury, England

What is Stonehenge?

Stonehenge is a huge and mysterious circle of stones in the south of England.

No one is sure who built Stonehenge or why, but it is thought that people began building it around 5,000 years ago. Some historians think that the circle was built for festivals. Other historians think that it is a kind of ancient calendar. This is because of the way the sunlight falls on different stones at different times of the year.

Why visit?

Stonehenge is an incredible sight. It is amazing because of the size of the stones. The tallest stone is more than six metres high. The heaviest stone weighs about 45 tons. The stones came from hundreds of kilometres away. People didn't have transport then, so how did they move them? No one really knows! Come and visit and see what you think!

Robinson Crusoe

by Daniel Defoe

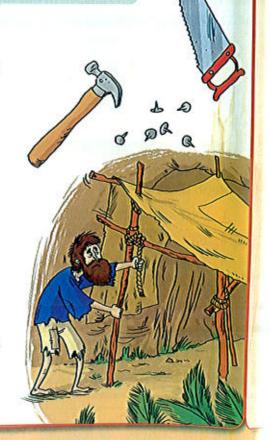

Robinson Crusoe was sailing to Africa when his ship hit the rocks in a terrible storm. He swam to the shore and discovered he was the only survivor. The next day, he swam out to his shipwreck. It was on some rocks near the island. He brought back tools and other useful supplies. Then he looked for a place to build a shelter.

There were some hills around me, so I decided to build myself a little house on one of them. I walked to the top of the highest hill and looked down. I was very unhappy, because I saw then that I was on an island. There were two smaller islands a few miles away, and after that, only the sea. Just the sea, for mile after mile after mile. I was all alone.

After a time, I found a little cave in the side of the hill. In front of it, there was a good place to make a home. So I used the ship's sails, rope and pieces of wood, and after a lot of hard work, I had a very fine tent. The cave at the back of my tent was a good place to keep my food, and so I called it my 'kitchen'. That night, I went to sleep in my new home.

The next day, I thought about the possible dangers on the island. Were there wild animals, and perhaps wild people, too, on my island? I didn't know, but I was very afraid. So I decided to build a very strong fence. I cut down young trees and put them in the ground, in a half-circle around the front of my tent. I used many of the ship's ropes, too, and in the end my fence was as strong as a stone wall. I felt safer when I'd finished the fence. No one could get over it, through it or round it.

Writing

1 Look at the text. What is it about? 2 Read.

An advice text

We can write to give advice about different things. We can use a concept map to plan a text.

IF YOU FIND YOURSELF ON A DESERT ISLAND, HOW DO YOU SURVIVE?

HERE ARE SOME TIPS!

Use bullet points to show each piece of advice clearly.

Use headings to make the information easy to find.

Use *in order to* and *so that* to explain why we need to do something.

Use imperatives to give instructions.

Keep sentences short and simple, and avoid unnecessary adjectives.

DRINKING

You need to find fresh water! Walk along the beach until you find a river.
 Follow it away from the sea and you will usually find faster moving water that you can drink.

EATING

 Next, you need to eat. You will find plants around the river. There will also be fish. Make a fishing line, so that you can catch them. You can use thin pieces of wood and thread from your clothes.

SLEEPING

 And what about somewhere to sleep? You will need a shelter. Use rocks, leaves and parts of a tree to build a small home.

KEEPING WARM

 Make a fire in order to stay warm. You can also use it for cooking and for keeping wild animals away.

GETTING RESCUED

 You will want to be rescued! If you put plants on your fire, they will make a lot of smoke. Someone might see it and come to find you!

3 Read again and answer the questions.

- 1 What's the best place to get fresh water?
- 2 Why should you make a fire?

The story of Atlantis is one of the oldest and most interesting mysteries in the world. Many people have written books about it and made films, too. So, how did the story begin? Well, more than 2,000 years ago, a famous Greek writer called Plato wrote a story about a beautiful island in the Atlantic Ocean. He called it the Island of Atlantis.

Plato described the people and the island in a lot of detail. He said that the people were very rich and successful. He said there were talented engineers and architects who built fantastic palaces, houses, harbours and tunnels all over the island. They built the capital city on a hill and this was surrounded by five rings of water and land. All around the city were fields and mountains. The people were very good at farming. They kept animals in their fields and grew many different things, so there was always lots of food on the island. There was also lots of fresh water and the farmers built a system for watering their fields.

The richest people on the island lived in the highest mountains. Plato described the amazing buildings they lived in. He said that there were beautiful fountains with hot and cold water, gold statues and stone walls covered in precious metals and jewels.

In the story of Atlantis, Plato described how clever and peaceful the people were. They loved art and beautiful things, and they lived happily and successfully together. He said that they were friendly with their neighbours on the different islands and never went to war. But then he described how they changed. As they grew richer, the people of Atlantis became selfish and greedy. They started to argue and fight with each other and the people from the other islands.

Then, one day, something terrible happened.
There was a huge earthquake and great waves covered the island of Atlantis until it disappeared under the sea. In the story, Plato said that this was a punishment because the people had become so bad.

For over 2,000 years, everyone thought the Island of Atlantis was just a fantastic story. Then, in the late 1800s, people started to think differently. It all started with an American man named Donnelly. He was a politician and a writer, and he became very interested in the story of Atlantis. He started to think that Plato had described a real place and a real tragic event.

3 Read again and answer the questions.

- 1 Who wrote about the Island of Atlantis?
- 3 In the story, what happened to the island?
- 2 What were the people on the island like at first?
- 4 What did they find on Thera in the 1960s?

4 Discuss.

- 1 Do you think the Island of Atlantis is real or just a story? Why?
- 2 Do you enjoy reading about mysteries? Why (not)?
- 3 Do you know about any other mysteries? What are they?

Donnelly studied the history of floods and natural disasters from Egypt to Mexico. He studied things that had happened thousands of years ago. Then he wrote a book and explained his ideas. He thought the story was about a real natural disaster. Perhaps there was a hurricane or an earthquake in the Atlantic Ocean near the island at this time. Perhaps it destroyed the island of Atlantis and all its people. Donnelly's book was very popular, and more and more people started to think that the Island of Atlantis was a real place. They started to have different ideas about where it might be and what had happened to it.

Then, in the late 1960s, there was a new idea. A Greek historian discovered the ruins of an ancient city on the Greek island of Thera, which is also called Santorini. This Greek island is famous for its volcano. When the historian and his team examined the ruins of the ancient city, they found streets, buildings, pottery and colourful wall paintings. All of these things were amazing, and they decided that a very successful group of people had once lived there. They thought perhaps these people were from the Minoan civilization. The Minoans were an ancient people that lived around 4,000 years ago on the islands in the Mediterranean.

The historian and his team also decided that the ancient city on the island had been destroyed and buried by a volcanic eruption. So, was Thera the island that Plato had described in his books? Was Thera the Island of Atlantis?

Not everyone believes that the ruins on the island of Thera are the ruins of Atlantis. Many people think the ruined island lies far beneath the sea in a different part of the world. Some people say it's near the Andes Mountains, in Bolivia. Others say it's close to Florida in the US. Other people think it was lost somewhere in Central America, the China Sea or Africa.

Of course, there are many more people that believe Atlantis is just a story. They say it was just a part of Plato's imagination. Whatever you think, the story of Atlantis is a great story and a great mystery.

We Didn't Mean to Go to Sea

What has happened so far ...

Jon, Susan, Roger and Kitty Walker were staying by a river. They met a young man called Jim Brading, who invited them to go sailing on his sailing boat. Their mother agreed, but told them to stay on the river and not to go out to sea. The children sailed to the mouth of the river, but then the wind died. They tried to use the boat engine to go back up the river, but there wasn't any petrol! Jim rowed to land to get some more. While he was gone, fog suddenly appeared, and then the children realized they were floating out to sea. They decided they had to wait until morning before they could return to the shore. But, when the fog finally disappeared, the rain started.

At first, the rain was not too heavy, but then the wind quickly became strong and, out of the west behind them, came a white wall of rain, falling down into the sea. It was still too dangerous to think of going back because they couldn't see anything through the rain. So, they went on, and the wind blew them further and further from the land. When it finally stopped raining, the sky in front of them was already growing dark, and the boat was sailing faster and faster through the tall waves. "Let's turn back now," said Susan.

Jon took a deep breath. He wasn't sure that he could find his way back, but he didn't say this to the others. "All right," he said. "I'll turn the boat around now."

The next moment, terrible things began to happen. When you are sailing with the wind behind you, you never really know how hard the wind is blowing. It's very different when you turn

> and sail against it. As the boat turned into the wind, a wave broke over it and water flooded the boat. Up the boat came again, then down again, and then there was another big wave. The children were soon knee-deep in water. Jon was scared, but he tried to steer the boat against a sea and a wind that were too strong for him.

> > "Stop! Jon! Stop it!" cried Susan, at last. "We'll have to turn round again! We can't do this!" Susan, almost shaken to pieces by the boat's new violent movement, lay across the side and was terribly sick.

4 Discuss.

- 1 Did you enjoy the extract from the story? Why (not)?
- 2 What do you think happens at the end of the story?
- 3 Would you like to go sailing? Why (not)?

Jon slowly steered the boat round. Very slowly, the little boat turned away from the wind and back on her old course with the wind behind them again. From the cabin, they heard Kitty's frightened voice. The boat was full of water and she needed to get it out before they started sinking. Susan found the pump, and began pumping hard to get the water out of the boat.

It began to grow dark. The wind was still blowing hard, but the boat sailed on smoothly. Even Susan began to feel better. No one had fallen into the sea, everyone was safe and, soon, the night would end. The sun would rise, the wind would stop and they would sail back to land.

Susan and Kitty didn't feel seasick any more. Jon's arms hurt with steering, but he felt much happier. Roger was hungry and wondered if everyone had forgotten about supper. "Susan," he said. "It's ten o'clock. What about some chocolate or something?"

"Ten o'clock?" said Susan in surprise. "It's time you all had something to eat." And, a few minutes later, they were all eating very large pieces of fruit cake and pieces of chocolate.

Suddenly, Susan saw lights ahead.

"There's a green light on one side and a red light on the other side."

"It's a big ferry, on its way from Holland to England. It's coming this way," said Jon.

"Maybe they could take us back home," said Roger. "It's getting nearer and nearer.

I can see it very clearly."

"But they can't see us!" shouted Jon suddenly. "We've got no lights! And it's coming straight towards us. We've got to get out of the way. We've got to warn them. Roger, sound the horn!" Jon was very frightened as the boat was coming straight towards them and it was very big. Roger sounded the horn.

Someone on the ferry heard the loud noise of the horn and, at the last minute, the ferry changed course. The green light of the big ship disappeared and it went quickly past their little boat, almost touching its sides. "Show your light, you stupid fishermen," came an angry voice from the ferry. Then the ferry had passed them and was off on its way to England. The waves that the ferry made were very big, and everyone was thrown from side to side and got very wet again. They were still in one piece, although they were sailing further and further away from England.

Languages of the World

Q How many languages are there in the world?

A There are around 7,000 languages spoken in the world. Some of these languages have almost disappeared and only have a few speakers left, but others are still spoken by millions of people! There are many languages which were widely spoken in the past and now no one speaks them anymore, for example, Latin or Ancient Greek.

Q What's the most widely spoken language in the world?

A Mandarin is the most widely spoken language in the world. It's the official language of China and about 900 million people living there speak it as their native language. Mandarin is also spoken in other Asian countries, such as Singapore, Malaysia, Indonesia and Thailand. So, altogether, Mandarin is spoken by almost 15% of the world's population!

QWhat are the next most widely spoken languages in the world?

A Hindi, English and Spanish are each spoken by over 300 million native speakers. Portuguese, Russian, Arabic, Japanese, German and French each have 100 to 300 million speakers. That's a lot of people!

Q More people speak Chinese than English, so why is English the international language?

A The reason is perhaps because English is spoken in so many different continents. People in the UK, the US. Australia, Canada, Ireland and New Zealand speak English as their first language. It's also recognized as an official language in more than 70 countries around the world!

Q Why do some languages disappear?

A International companies often have businesses in different countries. This is one reason why young people in these countries may learn the more dominant languages of the world and stop learning their own languages. Today, about 2,000 languages have less than 1,000 speakers. As time goes on, fewer and fewer people are speaking these languages and, soon, they may not exist anymore.

Q How many languages will there be in the future!

A Some scientists predict that half of the languages spoken in the world today will disappear by the end of the century as young people stop learning the language of where they come from.

I dreamed I was in a spaceship, Flying through the stars. I passed a comet on the way, As I <u>head</u>ed off to Mars.

The stars were as bright as <u>diamonds</u>
In the darkness of the night.
The moon shone like a <u>precious</u> pearl.
It was an amazing sight!

My spaceship landed on the moon.
It was wonderful for me!
So I climbed onto the <u>surface</u>
To see what I could see.

I walked round for a while, But there wasn't much to do. I found a flag and a rock or two, And then admired the view.

The next thing, it was morning. I was safe and <u>snug</u> in bed. I told my mum about my trip. "What a lovely dream," she said.

I stared at the scene before me.
It was such a lovely view.
A satellite spun round and round,
But on and on I flew.

I flew through the rings of Saturn, I circled the Earth below. Neptune shone with a dark, blue light And Venus seemed to glow.

The ground was very <u>bumpy</u>,
There were moon rocks all around.
Everything was very quiet
And I couldn't hear a sound.

My spaceship left and made a loop Around the Milky Way. And then I felt that it was time To go back home that day.

But I knew there was something real About my space trip to the skies. For I found a moon rock in my pocket And there was stardust in my eyes.

A poem

There are lots of ways of making poems sound more beautiful and interesting.

We use similes to make writing more interesting and create strong images in the reader's mind.

A simile is the comparison of two things.

We use *like* ... or *as* ... *as* to compare two things.

We sometimes write different verses. There are four verses in this poem.

We usually start each new line with a capital letter.

We sometimes use rhyming words. In this poem, the rhyming words are in the second and fourth lines of each verse.

Avoid forced rhyme – using words that rhyme but don't make sense.

TRAVEL BLOG: My Year Around the World

I'm Sara. I'm 12 years old and this is my blog! We left Canada in January when Mum and Dad decided they wanted us to give up our lives in Canada, and go travelling for a year! They said they wanted us to learn about lots of different things around the world by seeing them all! It was the start of a big adventure!

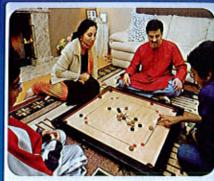

On Day 1, we flew to Delhi, in India. What an amazing place! It was so busy and noisy. There were hundreds of rickshaws, motorbikes and cars driving around, and people shouting and rushing everywhere. We spent a couple of days in Delhi and then went by train all the way down the coast to Kerala. The journey took four days! But it was so interesting to sit on the train and watch the sights out the window.

We stopped in a fantastic town called Varkala. There were palm trees on the beach, white sand and great sunshine. We sat on the beach for a few hours and then we decided to do something really exciting! We went on an elephant ride! We travelled through the jungle and across rivers. It was so exciting! It was quite scary being so high up on an elephant, but it was still great fun. Unfortunately, my brother Dan hated it because he doesn't like heights!

After Varkala, we spent a few days on a houseboat travelling down a river. We stopped once at a village and met a local family who invited us to eat with them. The food was traditional food from Kerala. It was quite spicy and full of different flavours. After that, the local children taught us a traditional Indian board game called Carroms. We also did some fishing from the boat and I caught my first fish! We cooked it and it tasted great!

We're going to spend a few more days in Kerala and then we're going to Sri Lanka. I'll write an update on my blog again when I arrive there!

An opinion essay

We can write an opinion essay to discuss the advantages and disadvantages of something. We divide the essay into four paragraphs.

Paragraph 1: the introduction (where we introduce the topic)

Paragraph 2: the advantages (where we explain the good things about the topic)

Paragraph 3: the disadvantages (where we explain the bad things about the topic)

Paragraph 4: the conclusion (where we make our final decision about our opinion)

Tourism

Every year, millions of people travel around the world to visit the islands in the Caribbean Sea. But is it a good thing?

There are some very good things about tourism in the Caribbean islands. Firstly, it is good for people to see the culture and history of other places. Secondly, tourists spend money in hotels, restaurants and shops. This is good for local people. Thirdly, tourism often means that better roads and airports are built, which is also good for local people.

However, not everything about tourism in the Caribbean islands is good. Firstly, tourists can make peaceful places busy and noisy because there are more people, cars and planes than before. Secondly, tourism can destroy wildlife because hotels are sometimes built on their natural habitat. Finally, many foreign businesses own the hotels, shops and restaurants. So, sometimes, big companies get all the money, not the local people.

It seems to me that although tourism can be good for islands in the Caribbean, it can have bad sides, too. In my opinion, it's always important for tourists to respect the local culture.

The Mysteries of

People have always been fascinated by Mars, and it has become one of the most explored planets in the Solar System. In the early 1600s, when the telescope was invented, astronomers looked up at the planet and wondered what it was like. Since then, as technology has grown, scientists have sent satellites to orbit Mars and robots to explore the surface. Over the centuries, they have discovered many things.

The Climate

Mars is known as the 'Red Planet' because it is covered in red dust. It has violent dust storms, so the surface is always changing. It is the second-smallest planet in the Solar System and fourth in line from the sun, which means it can get very cold. The highest temperature on Mars is about 25°C, but the lowest is around -120°C.

The Surface

Mars has an interesting surface. Scientists think meteorites crashed onto Mars billions of years ago because it has many large craters. The largest crater is about 1800 km across. There are also mountains,

The Discovery of Water

Mars is in the middle of an ice age, so liquid water cannot exist on its surface at the present time. However, photographs show markings on the surface of the rocks. Scientists think these markings suggest there were rivers there. Perhaps this was because of melting ice, or perhaps there was rain and snow. Some scientists even believe a large ocean once covered the northern half of Mars.

valleys and volcanoes. Olympus Mons is one of these volcanoes and is the highest mountain in the Solar System. It's around 21 km high, which is about three times higher than Mount Everest!

Extensive reading: The Mysteries of Mars

3 Read again and answer the questions.

- 1 Why is Mars called the 'Red Planet'?
- 3 What was the name of the first spacecraft to land on Mars?
- 2 What is Olympus Mons?
- 4 When did Curiosity land on Mars?

4 Discuss.

- 1 Do think space exploration is a good idea? Why (not)?
- 2 Do you think humans will ever land on Mars? Why (not)?

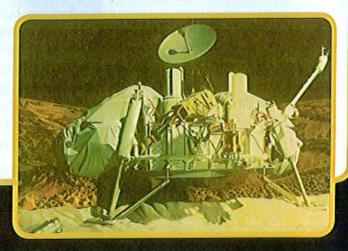

The Early Missions

The first missions to Mars began in the 1960s, when the Soviet Union and the US began sending spacecraft to orbit the planet. These spacecraft took photographs and collected information about many things. Some of them tried to land on the surface, but these attempts were unsuccessful.

Then, in July 1976, the first unmanned spacecraft landed on Mars. It was called Viking 1. In September, its twin, Viking 2, landed on a different part of the planet. These two spacecraft had computers that could record information around them and send it back to earth. However, the spacecraft could only stay in one place. So scientists weren't able to know what the whole of Mars was like.

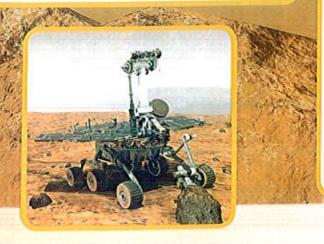

In 1996, the Sojourner was launched. This craft was different from Viking 1 and 2 because it could move around, like a remote-controlled car. It was known as a

rover because it could travel across the surface without a human driver, and explore other areas. In 2004, two more rovers were launched and landed on Mars. These rovers were called Spirit and Opportunity. Unfortunately, Spirit has since become trapped and has stopped working, but Opportunity is still active. It continues to move, collect information, take photos and report back to earth.

The Landing of Curiosity

More recently, in 2012, NASA sent a new rover called Curiosity to Mars. This rover, which is the size of a car, has six wheels and is around 2.8 metres long. It can travel 200 metres per day. It has computerized equipment which can survey rocks, soil and dust. It has cameras which can send images back to earth. It is the biggest and most advanced rover yet. Its mission is to find out more about the climate and geology of Mars, and also to find out if there was once some kind of life there.

The Future of Space Travel

Scientists have discovered a lot about Mars through satellites and different kinds of robots. However, they are working hard to improve technology. They hope that, one day, they will be able to send astronauts to walk upon the surface of the 'Red Planet', so that they can learn more about the mysteries of Mars.

Scientists also hope to develop ways to increase the number of people that can travel into space. It's already possible to pay thousands of dollars to book a place on a spacecraft and travel with astronauts. But, as more and more people are becoming interested, companies such as Virgin Galactic are planning to provide a space tourism service. Virgin Galactic is building a fleet of commercial spaceships, with the intention of making space travel a reality. And, as the demand increases, the price of tickets will become lower. Then, travelling in space, or even exploring other planets such as Mars, may become a reality for ordinary people.

The Diary of an ASTRONAUT

16th October

We had our usual wake-up call this morning, I didn't want to get up because I was really comfortable. Some people think that sleeping in space must be really uncomfortable, but it isn't! We sleep in sleeping bags in compartments and strap ourselves in so that we don't float around while we sleep. There is no gravity in space so, if something isn't tied down, it floats away! We also have eye masks and earplugs at night as it can be difficult to sleep because of the light and noise from the machines all around us. We usually have about eight hours of sleep but, last night, I only slept for about six hours. That's because I was staring out of the window at the views and taking pictures. It's amazing to see the earth and all the stars from up here.

When I was finally awake, I had a very quick wash. There isn't much water on a space station because we have to bring most of it from earth on the space shuttle. We use water for drinks and washing, but there isn't enough water for washing up, so we eat from food containers that we can throw away.

I had some bread and jam for breakfast. Some people think we only eat dry food in space, but this isn't true. We have lots of different types of food. Firstly, we have food that is ready to eat, like nuts and biscuits. Secondly, we have food that you have to add water to, like soup. We also have food from tins, such as fish and fruit. We drink from cartons and use straws so that the liquid doesn't float away and damage any of the machines. This is very important because, if liquid damaged the machines, it would be very dangerous in space!

After breakfast today, we did our usual cleaning jobs. It's really important that the space station is clean and tidy. This is because bits of rubbish can float away and damage the machines. All the rubbish we collect is taken back down to earth. After we had cleaned, we sat down and had our usual daily planning conference with Mission Control on earth. This is when we find out what work we have to do during the day.

3 Read again and answer the questions.

- 1 How does the astronaut sleep at night?
- 3 Why did the astronaut go on a spacewalk?
- 2 Who does the astronaut speak to every morning on earth?
- 4 How much exercise does the astronaut do every day?

4 Discuss.

- 1 Do you think exploring space is a good idea? Why (not)?
- 2 Would you like to be an astronaut? Why (not)?

08-00

My first job today was to go on a spacewalk to check for damage on the outside of the space station. First, I had to put on my spacesuit. Spacesuits are very important because they protect us from the dangers of being outside. Firstly, they protect us from extreme temperatures. Secondly, they protect us if we are hit by speeding objects in space. Thirdly, they provide the oxygen we need to breathe while we are in space. It takes about an hour to put on a spacesuit because you have to spend a lot of time checking for leaks or holes. But going on spacewalks is one of my favourite activities in space. It's such an amazing feeling to be floating out amongst the stars and the planets. Today, I didn't find any problems, so I was back inside the space station in time for lunch.

13.00

We usually have one hour for lunch and, today, we had soup and bread to eat, followed by some tinned fruit and some biscuits. After that, we cleaned up, had a rest and then got ready for the afternoon's work.

14-00

After lunch, I helped to repair a damaged satellite. We sometimes visit orbiting satellites when we need to repair them. We use the space shuttle's robotic arms to work on them, but we also sometimes pull them in so that we can work on them more slowly. We successfully repaired the damage and we will return the satellite to orbit tomorrow.

19.30

In the early evening, I did my exercise. Exercise is really important for us when we are in space. On earth, we are always using our bones and muscles to move against the force of gravity. In space, there is no gravity, so our muscles and bones don't need to work so hard! They can become very weak, so we do at least two hours of exercise every day on the exercise machines at the space station. If we didn't do any exercise, then our muscles might become so weak that we couldn't walk any more when we returned to earth!

After dinner, there was a meeting for the whole crew to discuss some of our plans for the rest of our stay at the space station. Then we had some free time. This evening, I listened to some music and wrote in my diary. I looked at the views and thought about how lucky I am to be an astronaut! It's brilliant!

Films in English

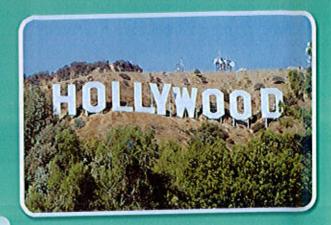

1 Listen and read. Find titles of eight films.
Which of these films have you seen? 6 116

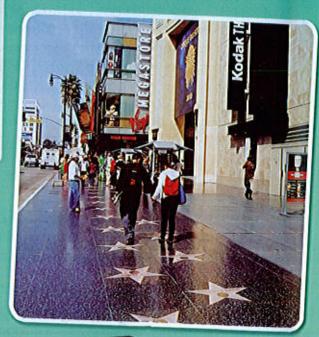

Do you like watching films? Many of the most popular films are produced by big American film companies. Some successful films are also made in other countries, such as the UK, Australia and New Zealand.

Hollywood is in an area of Los Angeles in California, US.

It has been the centre of the American film industry for about 90 years. Going to Los Angeles is a great experience because there is so much to do and see there. When you visit, you can go to a film studio and find out how a film is made. You can also visit the Hollywood Walk of Fame and see the names of the most famous actors written in stars on the pavement.

Some of the films produced by the big American film companies are filmed in other countries. For example, when they made *The Chronicles of Narnia*, many of the scenes were filmed in New Zealand. And *X-Men: First Class*, starring James McAvoy, was filmed in England.

Factfile

India has the
biggest film industry in the
word. It's called Bollywood.
Most Indian films are in Hindi
because this is the most widely
spoken language.

Culture Films in English

Other English-speaking countries, including the UK and Australia, also have their own film industries. Some famous Australian actors include Sam Worthington (Avatar) and Hugh Jackman (Les Misérables). Which

actors do you know from these countries?

Blockbusters

Many old, successful films have been remade in the last 20 years because technology has improved. For example, when CGI (computer-generated imagery) became popular and cheaper, many studios began to remake classics like King Kong and Charlie

and the Chocolate Factory. These are now modern blockbusters!

The Hobbit films and Lord of the Rings films are a series of fantasy films. They were filmed in New Zealand.

The Toy Story films are some of the most popular animated adventure films. When Toy Story was made, it was the first film created on a computer. The same studio also made The Incredibles and Monsters University.

Jack	Hi, Lucy. Thank you for agreeing to this
	interview. I know you only arrived home
	this morning. It was a long plane journey, wasn't it?
Lucy	Yes, it was. The flight took eight hours.
Jack	You hadn't been to Canada before, had you?
Lucy	No, I hadn't. It was a great experience.
	I went to the Rocky Mountains.
Jack	Can you tell us something about them?
Lucy	Yes. The Rockies are a huge and beautiful
	mountain range. They stretch for nearly
	5,000 km, and go from Canada, through the
	United States and then Mexico. The highest
	peak is Mount Robson. You can see forests,
	waterfalls, rivers and all kinds of wonderful
	things there.

Jack	You went to a national
	park there, didn't you?
Lucy	Yes, I did. I visited the Jasper
	National Park, which is a large
	national park in Canada. There's some
	amazing wildlife there.
Jack	You didn't see a bear, did you?
Lucy	No, I didn't. But I saw an elk. It was amazing
	I also saw deer and a pack of coyotes.
Jack	Tell me some more about Canadian culture
	What about the Mounties? Who are they?
Lucy	Well, the Mounties are the Royal Canadian
	Mounted Police. They're famous for their
	scarlet uniforms and Stetson hats and, of
	course, their horses. I suppose it's easier to
	travel around the mountains when you're
	on a horse!
Jack	And what about food? Maple syrup came
	from Canada originally, didn't it?

Let's talk about Canada!

Use questions tags in the present or the past tense to mean "Am I right?" or "Do you agree?".

In sentences with the verbs *be* and *have*, we repeat the verb in the question tag.

It was a long plane journey, wasn't it?

You hadn't been to Canada before, had you?

In sentences with most other verbs, we use do / did.

You went to a national park there, didn't you?

English around the World

 Listen and read the text about languages. Which three countries are the children from? 6 118

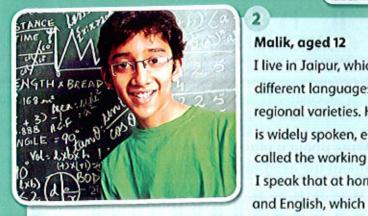

Atan, aged 12

I live in Singapore. There are four official languages in my country. These are: English, Mandarin, Malay and Tamil. English is the working language of the country. This means it's the main language taught in schools and used by business. My parents are Malay, so I speak Malay at home

with my family, but I speak some Mandarin and some Tamil, too. I speak English a lot with my friends at school and when we go out. There are a lot of visitors and tourists in Singapore, so I often have the opportunity to speak English to them. I like knowing differen languages, but I probably wouldn't learn another language unless I wanted to live in that country.

Malik, aged 12

I live in Jaipur, which is a city in Rajasthan in India. India has manu different languages. There are 22 main languages and over 1,600 regional varieties. Hindi is the official language of India, but English is widely spoken, especially in government and education. It's often called the working language of India. Hindi is my first language, so I speak that at home with my family. I can also speak Rajasthani

I learn at school. I love Indian films, but I like watching British and American films, too. I don't speak English at home unless we have English-speaking visitors. I have family in London so, when they visit us, I always speak English to them. I'd like to be a translator one day. I won't

be successful unless I speak English fluently.

3

Pilar, aged 11
I live in San
Francisco in
California in the US.
Almost 40 million
people live here,
and more than
50 per cent of them

are Hispanic, Asian, Native American or from another group. This means people speak a lot of different languages. English is the most widely spoken language, but millions of people also speak Spanish. My parents were born in California, but my grandparents were born in Mexico and came here when they were young. We always speak Spanish at home, and so I'm bilingual. I speak English with all my friends, at school and out on the street. I watch programmes in English on TV all the time. I don't watch films in Spanish unless my parents are watching them. I love listening to British and American music, but I enjoy Latin music, too.

letters and mail are in English!

Let's talk about languages!

Unless has a similar meaning to if not.
We can use unless in conditional sentences with don't,
won't and wouldn't.

I don't speak English at home unless we have English-speaking visitors.

I won't be successful unless I speak English fluently. I probably wouldn't learn another language unless I wanted to live in that country.

 - ... my British friend visits me.
 - ... I went to live in China.
 - ... my teacher asks me to.

I don't speak English at home unless my British friend visits me.

4 Write a paragraph about the languages you speak. Think about your official language(s), what you can speak and when you speak English.

I live in Rio de Janeiro in Brazil. The official language of Brazil is Portuguese and my parents are both from Brazil, so I speak Portuguese most of the time. I also speak Spanish and I try to speak English when ...

Class play: The Mystery of the Diamond Ring

- 1 Look at the pictures. What are the characters doing?
- 2 Practise the play with your friends.

Scene 1: The Newspaper Article

Narrator The children are in the school playground.

Joe Hi, everybody. Have you seen this story in the local newspaper?

(Joe shows them an article in a newspaper.)

Anna Not yet. What's it about?

Joe Do you know Mrs Jones?

Tom She's the lady who lives in Rose Cottage, isn't she?

Joe That's right. Well, she's lost her diamond ring.

Kate Has it been stolen?

Joe Nobody knows! Mrs Jones says she took off her ring when she

was washing up in the kitchen. She left it on the window ledge. Then she forgot about it.

Anna So it was stolen from the window!

Tom Yes, but who stole it?

Kate I've got an idea! We should do some detective work.

Anna And, if we solve the mystery, we can write about it for the school magazine!

Scene 2: On the Way to Rose Cottage

Joe Look! (Joe points.) Here comes the postman. He might know something.

(The postman is walking towards them.)

Kate Let's ask him.

Tom Excuse me. We're from the local school

and we're investigating the mystery of the

diamond ring.

Anna We're going to write about it in our school

magazine.

Postman That sounds interesting.

Joe The thing is ... Mrs Jones lost her ring on

Tuesday morning.

Kate And we were wondering ... Well, you deliver

letters to Rose Cottage, don't you?

Postman That's right. And, on Tuesday, I delivered

a parcel, too. I knocked on the door and Mrs Jones answered it.

Tom What time was it?

Postman It was nine o'clock. I looked at my watch because I was late.

Anna Did you see anyone else?

Postman Well ... yes. While I was standing outside, I saw someone walking round to the back of the house.

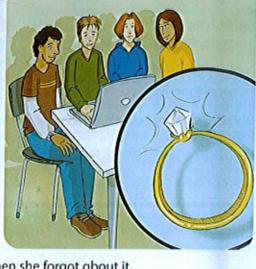

Joe What did he look like?

Postman I'm afraid I didn't look at him closely. I would have done, if I'd known it was important.

Kate Well, thank you. That's very helpful.

Postman Don't mention it. Good luck with the investigation.

(The postman walks away whistling.)

Class play: The Mystery of the Diamond Ring

Scene 3: At Rose Cottage

Narrator The children are at Rose Cottage.

(Kate knocks on the door. After a moment, Mrs Jones appears.)

Kate Hello, Mrs Jones. We're working for our school

magazine. We'd like to solve the mystery of your

missing diamond ring.

Mrs Jones That's wonderful! Come in.

(The children follow her into the kitchen. Mrs Jones walks over to the window.)

Joe Can you tell us what happened?

Mrs Jones Well, I put my ring here and then I left the room. When I came back, it was gone.

Tom Was the window open?

Mrs Jones Yes, it was. Oh dear! If I hadn't left it open, the ring wouldn't have disappeared!

Anna Can we go outside?

Mrs Jones Yes, of course. My grandchildren are there and so is the gardener. He was here on Tuesday, too.

(The children follow Mrs Jones outside. The gardener is digging up a flower bed. Mrs Jones's grandchildren are playing under a tree.)

Mrs Jones Hello, Bob. These children have been investigating the mystery of my diamond ring.

(The gardener stops digging.)

Joe Hello. Mrs Jones said you were here last Tuesday. We were wondering ... did you see the ring?

Gardener Yes, I did. I was walking past the kitchen at 9 a.m. and I saw the ring. It was sparkling in the sunshine.

Kate Did you see it there later?

Gardener At 9.15, I went to my van to get some tools. The ring was there. While I was getting my tools, my wife phoned me on my mobile. I talked for five minutes. When I went back to the garden, the ring had gone.

'(Mrs Jones walks over to talk to their grandchildren. Bob is digging again.)

Tom Hmm. What do you think happened? (There's the noise of a bird. The children look up.)

Kate I've got it! I know what happened! (Kate looks excited.)

Scene 4: The Mystery is Solved

Narrator The children explain the mystery.

Kate Listen everybody! We've solved the mystery of the diamond ring.

(Everybody gathers round.)

Mrs Jones That's wonderful! What happened?

Tom The postman said he saw someone walking round the back of the

house, but that was the gardener.

Joe And the gardener wasn't the thief because ...

Anna He's too nice! (The gardener looks pleased.)

Mrs Jones So where's my ring?

Kate Look up at the tree. Can you see that bird? It's a magpie. Magpies love stealing shiny things.

Mrs Jones Ah! You think the ring's in the magpie's nest, don't you?

Gardener Let's find out! I'll get a ladder.

(The gardener leaves and comes back with an imaginary ladder, He pretends to climb up to look in the nest.)

Gardener Here it is! I've found some other things too! There's a spoon and a bracelet as well.

(The gardener holds up a diamond ring, a bracelet and a spoon.)

Mrs Jones Oh, thank you! That's wonderful! And thank you, children. You've solved the mystery of the diamond ring.

Would you like some cake to celebrate?

Kate Yes, please! And then we must go and write our story!
